

INFRACON PERÚ 2025

International Infrastructure & Construction Fair

August 21st, 22nd, 23rd

Children's Health Citadel of the Virgin of VIDAWASI
Urubamba, Cusco

INFRACON PERÚ 2025

International Infrastructure & Construction Fair

This is the first International Infrastructure & Construction Fair organized by the **National Society of Construction and Infrastructure - SNCI**. An event designed to connect the public and private sectors, promoting investment in strategic projects that will contribute to the country's development and growth.

OBJECTIVE

To create a space that fosters and promotes the connection between national and international companies, investors, and authorities at both national and international levels, in order to encourage their participation in the various projects being developed in the country across key economic sectors such as Infrastructure (airports, hospitals, roads, highways, among others), Energy, Mining, Electricity, AI & Technology, and Tourism. Additionally, to promote Strategic Alliances, Technological Innovation, and Social Impact.

National Society of Construction and Infrastructure - SNCI

We are an association made up of Peruvian and foreign companies that meet high standards in the Construction and Infrastructure Sector. Our commitment is to execute important projects, maintaining constant leadership in quality, productivity, technological innovation, sustainability, social responsibility, and cutting-edge technology. We are dedicated to a strict culture of business ethics and high standards of compliance.

Participant Profile

INFRACON PERÚ 2025 will bring together top-tier exhibitors and a distinguished national and international audience composed of key decision-makers from both the Public and Private Sectors.

Among the attendees are: CEOs and high-level executives, national and international investors, Ministers of State, heads and representatives of public entities, directors of Multilateral Organizations, entrepreneurs, consultants, and experts in Infrastructure, Energy, Construction, IA & Technology, Mining, Tourism, and more.

An ideal space to connect, collaborate, and build the future of the country's sustainable development.

An opportunity to connect PERU with the world

INFRACON PERÚ 2025 is a strategic gateway for Peru opening its doors to the world and positioning the country as a hub of opportunity in infrastructure and development. This event will bring together leading companies from across continents, creating the ideal space for knowledge exchange, alliance building, and the promotion of key investments. It's the perfect occasion for national talent to shine globally, showcasing Peru's technical capabilities, forward-thinking vision, and commitment to sustainable development.

Moreover, **INFRACON PERÚ 2025** will serve as a key meeting point between the public and private sectors, where major projects will be presented through Public-Private Partnerships (PPPs), Works for Taxes, Government-to-Government Agreements, Asset-Based Projects, the New General Law of Public Procurement, agreements with international organizations, and other investment mechanisms.

The Central Government and Public Entities will have the opportunity to present their project portfolios, facilitating direct engagement with investors and companies. This interaction will drive the country's growth by opening new avenues for collaboration in strategic sectors such as Infrastructure, Construction, Mining, Energy, Tourism, Artificial Intelligence (AI), Technology, and more.
